

DO YOU LOVE SPACE?

If you're a student fascinated by space exploration, the Summer Center for Space Science program is for you. During this two-week experience at the Johns Hopkins Applied Physics Laboratory (APL), you'll interact with scientists and engineers, examine **real** space hardware, and tour facilities where APL builds, tests, and operates spacecraft for NASA that have been sent across the solar system. You'll be part of a student team that designs and builds a scale model of a spacecraft, complete with instrumentation, and you'll also launch your own water-bottle rocket! Come and join other students who share your interest in exploring new worlds.

This 10-day program is for G/T students entering grades 6–8 in fall 2024, and is open to public, private and homeschooled students from Maryland and other states who meet the criteria.

When: **July 8–19, 2024**
Monday–Friday, 8:30 a.m. – 3:00 p.m.

Where: **Johns Hopkins Applied Physics Laboratory**
11101 Johns Hopkins Road, Building 200
Laurel, MD 20723

Tuition: **\$650**

Enrollment is limited.
